

## Message from the CEO

Sustainability at Xindao is best described as being our Mission to create a positive Impact. It reflects how Xindao looks at the future: we have a Mission at which we plan to succeed and we are committed to making a positive impact on the world. Every step counts, large and small!

Our mission is a joint effort involving our own employees, our customers and other stakeholders. We are aware, more than ever, of our impact and the need to improve our footprint. To increase our value through sustainability and keep our company relevant for the future.

We encourage you to take a look at our CSR website and to engage with us. Together we can do more.

Join us on our mission!

Albert van der Veen, CEO
